Kern Yoon

I give Magnus Flooring 2 thumbs up. Marko was thorough when he inspected my house and gave a detailed consultation before installing the floors. I knew what to expect. The guys who installed my floors were very proficient and did not waste the hardwood floors. You can tell they had a lot experience. Also, when there were little mistakes and touch ups Marko sent his guys back to fix with no issues. Great service and great communication! They also installed 5.25 inch base molding for very reasonable price, which even made my house look even better. I highly recommend Magnus flooring.

Taneva Robinson

I can not voice how happy I am about my recent experience. I looked for someone to do floors and I have had many people come out but I knew I wanted Magnus Flooring to do the work. Marco is very professional. His response time is very fast and the work is phenomenal! Oh how I wish they did more than just floors I'll hire them for everything.

The Rodriguez's

It was a great experience from the start. Marko came to our newly purchased (empty) home, measured all rooms, laid it out on his tablet and priced the job on the spot. Marko was easy to work with and had a team readily available to start sanding and refinishing our entire home. The job was completed in 2 days! Magnus has fair pricing for the exceptional work they do. We will definitely use their services on future projects and would recommend to friends and family.

Tony Philip

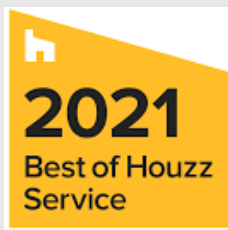

Incredible professionals that put the customers peace of mind at the forefront of the entire process. The work itself is detailed, but their process is efficient and thorough. Great value service!

Margie & John

This company is GREAT! Marko and his team were so professionals. We are very pleased with their work. My husband and I bought a house in Parsippany, and doing some remodeling. We are super satisfied with the hardwood refinishing service, our floors look incredible. We didn't

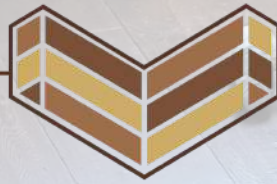

think that refinishing would have done this much of a difference. We also added carpet throughout the second floor of our room and in the kids playroom. Marko was VERY patient with us well more me lol. We really enjoyed working with him. We HIGHLY recommend.
